

To whom it may concern,

Please see our fee schedule for current water tap fees in and out of district which include the installation of taps (digging, boring, etc), deposits, and application fees. This is the total price for everything as long as the social security number is provided (if the SS# is not provided an additional fee will be added to the total). The only thing that would need to be verified would be the address to see as to which rate would need to be charged. All tap applicants must provide proof of ownership of the property and a valid ID. Our office accepts cash, check, money orders as well as debit and credit (If paying by check please make the check payable to CCW or Cleveland County Water). If you have any questions, please do not hesitate to call me at the number provided.

In district:

Out of district:

See fee schedule for current tap fee rates

Once the applicant has applied for the meter and submitted all paperwork and payment, we start the process of getting everything in the system. When the process is started it can take 2-3 weeks before the meter is installed on the property. This is allowing other utility companies to go and mark their lines before we begin our digging work.
